OREGON STATE HAM CONVENTION

¶ ARRL filed a Motion for Expedited Action for the expansion of phone segments in the 75-, 15-, and 10-meter bands, P.R. Docket No. 82-83, on March 28. This proceeding started two years ago when the FCC released a Notice of Inquiry and Proposed Rulemaking in March 1982. The League suggested the phone band expansion later proposed by the FCC in a Further Notice of Proposed Rulemaking in the same proceeding. It is now almost a year since the Further Notice was issued, and eight months since comments were filed in response to that Further Notice. (See QST, June 1983, p. 59 and September 1983, p. 63.)

¶ On March 28, ARRL filed a Petition for Rulemaking seeking early implementation of the Amateur Service allocations at 24.89-24.99 and 902-928 MHz. The mode subdivisions proposed for the 24-MHz band correspond to IARU band plans adopted in the three IARU Regions, including our own Region 2. If granted, our petition would result in operation being permitted at the usual amateur power levels by General and higher class licensees at 24 MHz, and Technician and higher class licensees at 902 MHz.

The U.S. government still has Fixed Service operations in the 18-MHz band and will not be ready to release that band to the Amateur Service until those operations have been relocated elsewhere. The latest that can occur under the international Radio Regulations is July 1, 1989, but there is reason to expect action somewhat earlier; we're continuing to maintain a close watch on the situation.

¶ The petition filed by Wayne Green, W2NSD, asking that radio amateurs be tested in the International Morse code every two years, upgrading their skills by 5 wpm each time until a rate of 35 wpm is achieved, was dismissed by the Chief, Private Radio Bureau, under delegated authority on March 9. The letter said that the Commission shouldn't impose this burden on amateur licensees and enumerated the forces already contributing toward improvements in code speed such as WIAW code practice and ARRL code proficiency awards. The PRB chief also expressed the opinion that the present rules were adequate to ensure that Morse code proficiency will continue in the Amateur Radio Service.

¶ ARRL received two comments opposing the League's petition to allow F1 emissions on 160-meters (see vol. 3, no. 4). Offshore Navigation, Inc., a corporation "whose primary business is the rendition of commercial radiopositioning services" has filed comments with the FCC in response to ARRL's petition to allow F1 emissions on 160-meters. Basically, "Offshore Navigation does not object to the rule requested by ARRL, subject to the caveat that said action does not recognize or confer any rights upon the Amateur Service greater than those otherwise accorded to a secondary service."

Racal-Decca Survey, Inc., also filed comments with the Commission opposing the League's petition. "Racal has no objection to the use of F1 emission as a general matter but questions the wisdom of newly authorizing such operation in the upper half of the band in question, 1900-2000 kHz."

Racal points out that with AM broadcasting expanding above 1600 kHz, 1900-2000 kHz will become critical for radiolocation services. Because of this, Racal says that "it would be undesirable to encourage investment in Amateur Radio equipment for a new kind of emission in that band. . . . Accordingly, if the Commission decides to go forward with rule making in response to ARRL's petition, Racal urges that any rule change be confined to frequencies below 1900 kHz."

¶ The ARRL Volunteer Examiner Program is preparing to serve all U.S. call areas plus locations overseas. The presence of other Volunteer Examiner Coordinators does not block the ARRL from also serving in a given area. Some VECs have already indicated that they will serve only temporarily, and will merge with the ARRL's program once it is in place. "Happenings" in May's QST will have a Volunteer Examiner Program update.

¶ Even with volunteer monitoring coming on line (as a result of provisions in Public Law 97-259, see QST, November 1982, p. 62), in cases of willful, malicious interference it still will be helpful, if not necessary, to have confirmation by an FCC monitor. A person experiencing willful interference on an hf band should therefore call the FCC Watch Officer, 202-632-6975, or one of the FCC monitoring stations while the interference is in progress. Amateur intercepts can then be used to buttress the case. Complaints without intercepts to back them up are not terribly useful to the FCC Enforcement Division.

AWARDS BANQUET WINNERS

Pati and I had a fun time buying the prizes for the women this year. We bought six prizes, two each first, second, and third. The third prizes and their winners were: Cattails and Butterflies sculpture-Bev Nelson, the silk-flower arrangement-Marge Rembaugh. The second: Princess House crystal and platter-Ellen Leslie, the crystal box-Cheryl Dietsch. The first: the burl clock-Terry Elkins, the rhodolite garnet necklace-Arlene Fannin. Hope they all will enjoy the prizes as much as we enjoyed buying them.

BANQUET WINNERS--MEN

Jim and Steve had the men's prizes this year, which Steve tried to walk out the door with. The first prize was a doozy, a IC-560 6m rig that Raleigh, WB7WNF, won. There were two wattmeters, one VHF and one HF, the winners were Ray, WA7EKH and George, N7BT. Bob, KB7LM, won an isopole antenna and Mike, WB7AYU, won a handbook. There were two more prizes, but my memory has faded. As usual it is fun to see what the prizes were and who had lady luck on his lap. Congrats to the winners.

SPECIAL AWARDS

Traditionally there are awards given that are unusual to say the least, this year was no exception. Our first was a well-deserved roast to one of our most active members, unfortunately his memory isn't as active as he is. We gave the 1984 Weiner Award to Hal, N7NW for forgetfulness above and beyond the call of duty. He was reminded of the flea market recovery dinner that was held in two restaurants, the parts that would be forgotten on VHF contests, and meetings he called, but forgot to come to. Irregardless, we really appreciate his efforts. The second one was to go to Jim, K7ND, but he couldn't make the banquet, so he received his "ham" mug at the next meeting. The "Ladies Friend" award went to Ray, WA7EKH, for his work gathering and delivering the newspapers to get the extra money for the Ladies' prizes. Last, but not least, was the

giant chocolate chip cookie and wine award given by Pati to Deborah, N7AVC, for the goodies usually available at the board meetings. All in all, it was great fun to come up with the ideas and watch the faces when they were announced. Let's see what we can find to award for next year.

VEC BOARD REPRESENTATIVE ELECTION

At the next meeting on May 19th we have to elect our club representative to the VEC board. We have two volunteers with their names in the hat. Royce, KC7MO, helped with the writing of the VEC proposal that the FCC has excepted, and Jim, K7PHZ, who has expressed a desire to help with the program. The requirements are to be either an Advanced or Extra class license and not be an elected officer. If you would like your name on the list just contact a Board member and we will get you on the slate. It is a very important job and I'm sure we will get a good man for the job.

The Boeing BEAR's VEC proposal was excepted by the FCC and there are currently two elected members to the Board. Eppy, N7CAL, is the Boeing rep and therefore the chairman, the Auburn club has a rep, but I don't have his name. Eppy was at the KCAR meeting on May 10th and is trying to get the board organized. He will be sending letters to all the clubs in the 7th call area in the near future regarding the rules and procedures, he will also ask for comments and critiques of the program, so there will be more in the future. If you have comments or would like to volunteer help write to: Herschel Epstein, N7CAL, 12822 NE 61st St., Kirkland, WA 98033. Please do not try to phone him, he requests everything in writing.

¶ ARRL filed comments with FCC on April 16 supporting rule amendment proposals to allow reimbursement of out-of-pocket expenses incurred by both Volunteer Examiners and Volunteer Examiner Coordinators. The proposals are contained in the Notice of Proposed Rulemaking in P.R. Docket 84-265, reported in May QST's "Happenings." Its purpose is to implement recent Communications Act amendments authorizing the Commission to provide for cost recovery in the Volunteer Examiner Program.

In support of its position, ARRL stated that the rule changes proposed in the Notice simply implement Congressional mandates contained in the Federal Communications Commission Authorization Act of 1983, a measure supported by the amateur community generally. The League recited a portion of Senator Barry Goldwater's statement to the floor of the Senate at the time he introduced the legislation, which strongly supported the cost recovery provision along the lines suggested in the Notice. The League also noted FCC Chairman Mark Fowler's reply to a Goldwater letter wherein the chairman stated that the Commission's belief that "the legislation you propose may also be

the most effective means of insuring that volunteers do not incur inordinate out-of-pocket expenses." ARRL added, "for the volunteer examination program to be continuously sustained, the proposed method of reimbursement of prudently incurred out-of-pocket expenses is necessary."

The League said that the Notice does not specify how the cost reimbursement amount is to be divided among Volunteer Examiner Coordinators and the Volunteer Examiners. ARRL said a more appropriate forum for this issue is in the VEC's proposal to FCC for VEC appointment, reasoning that there may not be any significant VE expenses, depending on the VEC's game plan. The VEC will undoubtedly incur the vast majority of expenses -- printing, assembling, distributing, recovering and processing of large numbers of exams. The League urged that the FCC decision in this proceeding reiterate its interpretation that it is a matter between the VEC and its VE's how, if at all, the cost reimbursement amount is to be apportioned.

ARRL concludes by requesting quick action in adopting the new rules, so the Volunteer Examiner Program can quickly fill the present void of exam opportunities.

¶ Joe Schroeder, W9JUV, filed comments on the FCC's proposal to allow cost recovery in the Volunteer Examiner Program, requesting that "whatever fee a VEC charges must be justified by proper accounting procedures". Schroeder said VECs should be required to record expenses and make them available for FCC inspection. VECs should be able to collect all fees, then reimburse VEs based on appropriate documentation of expenses.

Schroeder further suggested that a VEC

should be required to file with the Commission an "Examination Fee Schedule" showing both the fee it is charging to administer an exam and a brief summary of the justification for that fee. A VEC may change its fee when necessary, but must give the appropriate FCC Field Office 30 days notice before imposing the change.

Schroeder feels that these suggestions should "help forestall accusations that a VEC is 'profiteering' from its participation in the program."

¶ Radio amateurs and cordless telephones have made the evening network news. CBS news reporter Bob Schieffer showed a man listening to a telephone conversation on 1707.8 with a Kenwood TS-430S. The news item was well done and lasted a good two or three minutes. This should effectively demonstrate to the public that cordless phone conversations are not very private, and that almost anyone can listen in on their conversations.

¶ ARRL President Larry Price, W4RA and International Affairs Vice President Dick Baldwin, W1RU, have returned from what both report was a very worthwhile trip to the International Amateur Radio Union Region 1 Conference in Cefalu, Sicily. At the Conference, John Allaway, G3FKM, was elected Secretary of Region 1.

GENERAL MEETING April 21, 1984

Introductions and "What are your mobile capabilities?"

Officer Reports:

VP: Going through records to update the roster and make corrections.
Sec: read minutes and correspondence from Mrs. Brown and Ray Beik, NH6K.
Trea: Current bal. \$7283.24.
Act: May 2nd Potluck, plans for upcoming months.

Announcements:

WA7ELI on Diabetes Bike-A-Thon; WA7EBH on Opening Day 5/5; W7GPW moving to Camano Island; Field Day site lined up and progressing smoothly.

Committees:

Budget: rough draft, meet and present at Board Mtg, 5/4.
Constitution Review: meeting 4/27 @ WA7EKH's
Audit: everything's fine-KB7ZS
Field Day: rolling along, look for generators
Training: looking for sites, not this summer
WWARA: N7NW to talk to K7CR

N7AMX requests that the 20M beam be taken off inventory because we didn't have one.

Presented Appreciation Award to K7ND.

New member: Tom Phelan, KA7SEH, will do a Novice station at Field Day.

Club jackets: N7NW to arrange jackets with Club logo silkscreened on back, should cost appr. \$20. KB7ZS to check into getting a girl to do a screen stamp for smaller items.

Banners: WA7EKH reported that a 3'x10' Mike & Key ARC banner would cost \$125.
A 3'x8' Electronic Flea Market " " \$75.

Motion to purchase said banners approved. WA7EKH to handle.

Flag standards: WA7EKH to investigate cost of two to display the USA and ARRL flags. Motion to purchase said flag standards voted and approved.

Women's Auxiliary: Diana Becker to chair.

New Business:

Picnic Committee: KB7LM (chair), N7AVO, WB7AYU, KB7ZS.

Auction: N7NW, N7AMX, K7PFR, K7PHZ, WB7WNF. This year no selling before item goes to auction block, no exceptions. KB7LM knows a professional auctioneer.

Letters to go out to: Latitude 47; the flower lady; the jeweler; all for Awards Banquet.

Motion to adjourn. Followed by K7KOT presentation of satellite antennas he built.

"Happenings" in May's QST will have a Volunteer Examiner Program update.

¶ Even with volunteer monitoring coming on line (as a result of provisions in Public Law 97-259, see QST, November 1982, p. 62), in cases of willful, malicious interference it still will be helpful, if not necessary, to have confirmation by an FCC monitor. A person experiencing willful interference on an hf band should therefore call the FCC Watch Officer, 202-632-6975, or one of the FCC monitoring stations while the interference is in progress. Amateur intercepts can then be used to buttress the case. Complaints without intercepts to back them up are not terribly useful to the FCC Enforcement Division.

Main Prize Drawing

— Major Prizes —

ICOM IC-745 Transceiver
Yaesu FT-757 Transceiver
Kenwood TM201A 2m. Mobile Transceiver
Commodore C-64® Computer
